Compliance with Legislation

The increased regulation and control of our industry by the Environment Agency reflects a persisting public concern.

Compliance with all relevant Acts of Parliament and any entailed regulation is central to our activities and not merely because those activities are so much more closely monitored.

Legislation compliance is the foundation of good public relations since its absence is a betrayal of public trust.

Legislation compliance on our part will help to ensure risk minimisation to your operation, arising through a business relationship with us.

We undertake, not only to abide by all relevant legislation ourselves, but also to assist our clients, where we may, in such compliance.

Company Compliance Documentation includes: -

- Waste Carriers Licence
- Operators Licence
- Controlled and Special Waste Licence (disposal outlet)
- Trade References
- Environment Agency Audit Reports

If you require further information concerning the company's Legislation Compliance, please do not hesitate to contact us.
